

The Plant Review Handbook 2024

Celebrating plant societies and their work

From the editor

It is easy to become blasé about the horticultural riches that surround us in the UK. The abundance of species brought to our shores from around the world means that, in terms of biodiversity, our garden flora dwarfs our native flora. This multitude of cultivated plants has been further swollen by chance

crossing and deliberate breeding to the extent that we don't even have a precise idea of their number.

These many thousands of exotic species have been used to create landscapes and ecologies that could never have existed with the 1,500 or so indigenous plants that made it to these islands of their own accord. The presence of exotics everywhere, from village greens to suburban gardens, inner city carparks to dentist's waiting rooms, has helped characterize a nation and shape its inhabitants into gardeners, plant-lovers and environmentalists. The full power and potential of this wealth of cultivated plants to sustain ecologies, tackle climate change and improve human lives is only starting to be understood. However, they are sure to be essential assets in meeting whatever challenges the future holds.

At the same time that the enormous value of non-native species is beginning to be explored, it has never been more difficult to introduce new species from abroad. There are very good reasons for this, not least the risk of introducing unwanted plant predators and pathogens along with the plant material. But it does mean that we can no longer take for granted a steady stream of new

introductions. We have to conserve the cultivated flora that we have now.

Alongside organizations such as the RHS and Plant Heritage, plant societies have a huge and vital role to play in making sure that the genetic resource of cultivated plants is not allowed to dwindle. As plants in captivity they rely on human intervention for their perpetuation, and so are most vulnerable to extinction when they are at their least fashionable. That is where dedicated enthusiasts come to the fore. If you hold a torch for a particular group of plants, I hope you will join a plant society and ensure that those plants continue to thrive and grace our landscape for generations to come.

Explore the world of plant societies

Plant societies are always delighted to welcome new members, whether you're a complete beginner or experienced gardener. Whatever you love and choose to grow, whatever space you have for plants, there should be a plant society for you.

Full of friendly enthusiasts ready to share the enjoyment and knowledge of their favourite plants, plant societies provide their members with the opportunity to meet each other, share experience, knowledge and plants, as well as offering a varied and exclusive range of benefits and activities which may include:

- Visits to collections and gardens not usually open to the public
- Opportunities to grow new and unusual plants through seed distribution and plant-sharing schemes
- The opportunity to take part in shows and competitions
- Regular publications and yearbooks
- Access to information and advice
- Online meetings, activities and competitions, making it even easier to get involved
- Talks and demonstrations
- A website that provides a wealth of information, advice, guide to events and inspirational photography

Many hold shows, competitions and plant sales at RHS gardens and other locations, so check their websites for more information on these events. These gatherings are a wonderful opportunity to meet the society members, to chat about any questions you may have, as well as enjoying displays, plant sales, new and unusual plants, and join in with talks and demonstrations.

Members enable plant societies to grow, thrive and continue providing advice as well as supporting the survival of a range of unusual and rare plants. This handbook should give you all the information you need to find out more about joining a society that represents your favourite plant, and perhaps inspire you to grow something new.

CLEMATIS 'VILLE DE LYON' ANNA BROCKMAN/RHS

Gentiana sino-ornata 'Starlight'

Alpine Garden Society

Founded in 1929, the AGS is now one of the largest specialist garden societies in the world. It is a charitable organisation primarily concerned with the cultivation of alpine and mountain plants.

The AGS is passionate about the conservation of alpine plants in the wild and it funds various projects across the UK and abroad. It also supports the development of knowledge and skills in the alpine field through conferences, study days and its AGS Trainee Scheme.

Members enjoy many benefits, from webinars, plant fairs and informative publications, to expert-led tours and one of the biggest seed exchanges in the world. The Society's quarterly journal is packed with articles and advice for enthusiasts of all abilities and experiences. Anyone can visit the AGS Garden at Pershore for free.

Grevillea juniperina f. *sulphurea*

Australasian Plant Society

Formed more than 30 years ago, the Australasian Plant Society was born out of a shared love of growing plants from Australia and New Zealand and the islands that surround them. Its members include people growing Australasian plants in their back gardens, keen enthusiasts, public gardens, nursery owners and head gardeners.

The Society aims to encourage the conservation and cultivation of Australasian plants and promote their suitability for the garden. Experienced growers are happy to share their specialist knowledge of these unusual and unique plants in person and through the Society's journal *Pentachondra*.

Rebutia 'Stardust'

British Cactus and Succulent Society

The British Cactus and Succulent Society has a worldwide membership and 70 branches in the UK and Ireland. Joining is a great way to learn more about these fascinating plants and meet like-minded enthusiasts through regular meetings.

The Society helps enthusiasts grow and enjoy these plants and provides an insight into their origin in nature. Its charitable objectives are to support professionals in the field in their research and conservation activities.

New members receive a pack containing useful information and cultivation and propagation guides to get started, as well as seeds.

Clematis 'Prince Charles'

British Clematis Society

The British Clematis Society was founded in 1991 in response to the growing interest in clematis. Its aim is to advance horticulture and promote the cultivation and preservation of the genus, encouraging more gardeners to grow and enjoy clematis.

There are three newsletters and a full-colour journal each year, plus members' meetings, workshops and seminars on both a national and regional basis. Members have their own private section within the British Clematis Society website and access to the Society's Facebook page.

Conifer garden of Mr D Ward, Leeds

British Conifer Society

For nursery people, enthusiasts and organisations with an interest in conifers, the non profit-making British Conifer Society produces two issues of its journal annually and organises visits in both the UK and abroad.

Overseas trips are operated jointly by the BCS and the Dutch Conifer Society, and in the last few years have included destinations such as France, Ireland, Italy, Latvia, Estonia and two locations in the USA.

Follow them on Facebook under the British Conifer Society, where you can ask questions that will be answered by a committee member, and join their British Conifer Society Facebook group.

Hostas and hemerocallis

British Hosta and Hemerocallis Society

Founded in 1981, the Society aims to explore and record the history of *Hosta* and *Hemerocallis* (daylilies) and increase the knowledge and appreciation of the genera. It also encourages the cultivation of these beautiful plants, answers botanical and cultural enquiries, and gives advice. The Society gives awards for special achievements in growing or promoting them.

Membership brings with it a range of benefits, including full-colour publications and the opportunity to meet up with other members to learn more about these plants.

The public area of its website gives free access to information and news about hostas and hemerocallis. Access to the membership area allows viewing of past and present publications, including the hosta and hemerocallis handbooks. It also provides access to a list of library materials available to borrow and a directory of members' open gardens and specialist nurseries.

Iris 'Spirit of Kent'

British Iris Society

Membership of the British Iris Society is for anyone who admires irises and wishes to further their knowledge of the genus. Founded in 1922, the Society's interests include all of the *Iridaceae* from *Anomatheca* to *Watsonia* including *Crocus* and *Gladiolus*, but predominantly *Iris*.

The Society has three local groups: Kent, Eastern Area and West & Midlands and three specialist groups: Beardless Irises, Historic Group and Species Group. All groups have their own annual publications and hold various events including lectures and garden visits. The Society's own shows are a chance to exhibit but also to meet fellow enthusiasts and breeders and gain from their knowledge. The annual lecture day and AGM venue varies each year, but the meeting is always a friendly affair, so do think about joining if you have an interest in the *Iridaceae*.

Follow the Society on Facebook and Instagram.

*Athyrium niponicum*

British Pteridological Society

This Society for fern enthusiasts was founded in 1891 and is a focal point for those interested in ferns. It provides a wide range of information about ferns through its website, journals, leaflets and books.

The Society also organises talks, excursions, field and garden meetings, and online talks through its regional and special interest groups.

The aims of the Society, which is run on a voluntary basis, are to promote all aspects of pteridology by encouraging the appreciation, conservation, cultivation and scientific study of ferns, horsetails, clubmosses and quillworts through publications, meetings and the provision of grants.

Its international membership includes those interested in gardening, natural history and botany, both amateur and professional. The Society is affiliated to the RHS and Plant Heritage and supports recording and conservation activities with other botanical societies.

*Nepenthes x ventrata*

Carnivorous Plant Society

Membership of the Carnivorous Plant Society is for everyone interested in growing and learning more about these fascinating plants and their amazing adaptations. It is devoted to education and conservation, because only through awareness can these special plants and their habitats be protected.

Joining the Society brings introduction to like-minded enthusiasts, a wealth of growing advice, tips and social events. Your membership helps to fund conservation projects.

The Society is present at most RHS Shows and holds carnivorous plant weekends at some RHS Gardens and botanical gardens. In addition, the Society holds its AGM in the spring and its end-of-season meeting in the autumn. Talks are given to garden clubs and Society members hold around 20 open days across the country.

Cottage Garden Society

With a more natural approach to gardening, the Cottage Garden Society, founded in 1982, encourages members to grow flowers, vegetables, fruit and herbs together, combining beautiful scents and colours with practical production. The resulting spaces provide a haven for birds, butterflies and other wildlife. By working with nature and companion planting, the Society aims to conserve older and rarer species of plants and protect them for the future.

Members take part in a very popular seed exchange. We have 30 local and specialist groups across the UK, and with members all over the world there is always someone new to meet. Follow the Society on Facebook.

Cyclamen Society

The Society is for gardeners, horticulturists and those with a more scientific interest in the genus *Cyclamen*. It is a UK registered charity, founded in 1977, and has 1,200 members. The Cyclamen Society furthers the knowledge of *Cyclamen* in cultivation and in the wild. It works towards conservation efforts and finances research by DNA and other studies.

Membership benefits include a journal with articles on cultivation, *Cyclamen* in the wild, research results, botanists and historical botanical art, and seed distribution. There's also access to a panel of experts and a library with publications on *Cyclamen*. The competitive shows provide an opportunity to meet other members, buy plants and get advice from experts.

Delphinium Society

The Delphinium Society is a registered charity with members worldwide. It was established in 1928 to promote the growing of delphiniums by means of educational, instructional and advisory services to its members. In 2023 it celebrated its 95th anniversary.

In 2014 the Society set up a plant donation scheme to raise the profile of delphiniums, and has provided significant numbers of plants to gardens open to the public around the UK. A list of these sites can be found on its website. It is the Society's intention to continue this scheme while funds permit.

The Society has an active Facebook group with 4,800 participants.

*Brahea armata*

European Palm Society

Founded in 1991, the European Palm Society (EPS) champions and is dedicated to the growing of palms and other exotic plants across Europe and other temperate regions. The EPS is affiliated to the International Palm Society. It recognises that many areas of the world experience similar climates to those in Europe, and therefore welcomes the sharing of experiences and knowledge from growers worldwide. The main goal of the EPS is promoting the pushing of boundaries in growing palms and exotics outdoors. It also encourages the cultivation of tropical and subtropical species in homes, conservatories and glasshouses.

Members communicate and share experiences through its website, discussion forum, Facebook page and by garden visits. An online archive of its former journal, *Chamaerops*, and other documents relevant to growing palms and exotic plants are available. Members can also share pollen to raise pure seed of less common species and develop potentially ornamental gardenworthy *Trachycarpus* hybrids.

- Occasional seed offers of less-common palms

Fritillaria epirotica

Fritillaria Group

The *Fritillaria* genus comprises about 160 species around the northern hemisphere. They grow in a variety of habitats from coastal cliffs to high mountains, and from seasonally wet habitats to semi-deserts. The Group's members grow a wide range of species successfully, including those that thrive in the open garden and others that require more specific conditions and careful nurturing.

The Group was formed in 1997 to increase interest in the observation and culture of this fascinating genus. Today it comprises members from all over the world, including both amateur and professional gardeners, amateur and academic botanists, plant breeders, geneticists, ecologists and photographers who enjoy its diversity and beauty. The website includes an excellent guide to the genus.

Papaver orientale 'Patty's Plum'

Hardy Plant Society

This national charity aims to encourage interest in growing hardy perennial plants. Members receive *The Hardy Plant Journal* and three newsletters a year. They are also invited to join local and special interest groups to share their passion for plants.

The HPS website provides information about all its activities, regular blogs, image library and horticultural advisory service. Booklets and membership can be purchased there. The conservation scheme seeks to preserve older and less well-known cultivars and the seed distribution scheme offers around 2,000 varieties of seed donated by members. The Kenneth Black Bursary Scheme supports students and horticulturists working to further their education.

Hardy Plant Society – Special Interest Groups

Within the HPS are a number of Special Interest Groups, with members ranging from beginner to expert. For a small membership fee you can receive newsletters and attend an annual lecture day with a guest speaker and garden visit. The website for each group can be found at hardy-plant.org.uk/meet-us-at/specialist-groups

GALANTHUS GROUP

Galanthus Group

A must for snowdrop enthusiasts, Group members brave the cold and meet in February to admire the diversity of these gorgeous bulbs and for a chance to buy some of the more unusual cultivars. galanthus@hardy-plant.org.uk

HARDY GERANIUM GROUP

Hardy Geranium Group

There really is a geranium to suit every garden and hardy geraniums have been voted the HPS's favourite flower. Most are easy to grow and propagate providing flowers from spring to autumn. hardygeranium@hardy-plant.org.uk

Peony Group

Whether your interest lies with species or garden cultivars, learn more about these beautiful plants from knowledgeable members who share a passion for these sumptuous summer flowers. peony@hardy-plant.org.uk

CAROLINE STONE

JASON INGRAM / RHS

Ranunculaceae Group

This group of plants includes anemone, clematis, delphinium and thalictrum. It gets its name from 'rana', the Latin for frog, because many like damp conditions, but are adaptable and widely grown. ranunculaceae@hardy-plant.org.uk

TIM SANDALL / RHS

Pulmonaria Group

With flowers that can be red or white as well as the typical blue and pink on the same stem, pulmonarias are the perfect foil to spring bulbs. The foliage is usually variegated and may look good into autumn. pulmonaria@hardy-plant.org.uk

JASON INGRAM / RHS

Shade & Woodland Plants Group

Every garden has a shady spot, whether under trees or overshadowed by buildings. From hardy ferns to delicate trilliums, find out just how many beautiful plants can thrive in shady areas. shade@hardy-plant.org.uk

TIM SANDALL / RHS

Variegated Plants Group

Variegated plants are often used as a focal point or to lighten a shady area. This Group encourages the use of unusual variegated forms and is responsible for introducing a number of firm favourites. variegated@hardy-plant.org.uk

Veronica x andersonii

Hebe Society

The Society was formed in 1985 to promote the cultivation and conservation of *Hebe* (shrubby *Veronica*) and New Zealand plants in the UK and abroad. Most of its members are in the UK, though it has branches in Europe, USA, Australia and New Zealand.

The Society has established National Plant Collections of *Hebe* in Sussex, Yorkshire and Kent and supports their ongoing conservation. Its website has full descriptions of *Hebe* and a wide range of New Zealand plants. It is now the regional coordinator for the UK and Europe for new registrations of *Hebe* cultivars. In time, this will also include registration for all cultivars of New Zealand plants.

Herb Society

With a strong tradition of promoting the use and enjoyment of herbs going back more than 95 years, the Herb Society works to bring together and represent those who have an interest in herbs either for health, through medicinal, culinary and practical use, or from an artistic, historical or folklore perspective.

The Society prides itself on helping to increase the understanding and use of herbs for health and well-being and providing a worldwide forum for the exchange of ideas and information. It welcomes members of all levels of knowledge from amateur to professional.

The Society supports a number of education and community projects around the country. Corporate packages are available upon request.

Rosa 'Gypsy Boy' at Hinton Ampner

Historic Roses Group

The Historic Roses Group (HRG) is a plant society with a worldwide membership. It aims to encourage interest in timeless and beautiful older roses – the ancestors of all modern cultivars – and enable everyone to grow and enjoy roses of the past today. The HRG celebrates the importance of unique older roses of historic value, rose species and their hybrids, plus rare or unusual garden roses no longer widely grown.

Members meet regularly for exclusive day visits to gardens with interesting roses, and every year a week-long tour is organised to gardens of note in the UK or abroad. Information on historic roses, suggestions on what to grow and where to buy them, HRG publications for sale, and HRG events are all on the website. Members can request help on identifying old roses by contacting the HRG online or on Facebook or Instagram. Twice a year they receive its *Historic Rose Journal* with articles on the history and cultivation of older roses by specialists and researchers into rose history.

2024 EVENTS

- Guided visits to private gardens with old roses
- Annual five-day tours in UK and abroad
- The chance to help at professional shows

Daigo-ji Buddhist temple in Kyoto, Japan

Japanese Garden Society

The Society was founded in 1993 and is a registered charity to educate the public about Japanese gardens and support the construction, maintenance, and restoration of Japanese gardens. In addition to national activities, five regional groups across the UK organise local events which can be attended by all members.

Members can learn about Japanese garden designs through the journal, members-only area of the website and online lecture programme. These explore the culture and history of Japanese gardening traditions, offer advice about building Japanese-style gardens, and suggest ways to introduce Japanese plants and features into gardens. The Society runs garden visits across Britain and overseas. Members can attend national and regional events such as lectures, skills workshops, garden visits, and visits to specialist nurseries.

The Society welcomes amateurs and professionals, garden lovers and garden designers who are interested in Japanese gardens and wish to share their interests with like-minded people.

Mammillaria lenta

Mammillaria Society

Based in the UK but welcoming members from all over the world, the Society focuses on the largest genus of the cactus family, *Mammillaria*, and its allied genera, *Coryphantha*, *Thelocactus*, *Escobaria* (now *Pelecyphora*), *Neolloydia* and *Turbincarpus*.

Originating from Mexico and the southern United States, *Mammillaria* are mostly small, spherical cacti that flower in a ring around the plant, and often grow into small clumps. Many species can successfully be grown on a windowsill with good light.

The Mammillaria Society seeks to support enthusiasts in growing these lovely plants, and in particular to help in their conservation. With a growing membership of more than 250 enthusiasts around the world it will be delighted to welcome you to the Society. Find the Mammillaria Society also on Facebook.

Acer palmatum 'Elegans'

The Maple Society

The Maple Society is dedicated to furthering the knowledge, supporting the conservation and promoting the culture of all *Acer* species. It welcomes experts and amateurs from around the world and encourages discussion, promotes education and shares information. This is done through a quarterly journal, expert-led garden tours, online talks and a triennial symposium.

The Society supports the environmental protection, scientific study and conservation of maple species. Most recently, these efforts ensured a successful collaboration with Botanic Gardens Conservation International to produce *The Red List of Acer*, a definitive report on the conservation status of maples in the wild.

The Society is open to all, from those with a small courtyard garden growing a few trees in containers to arboretum owners; from Japanese maple collectors to bonsai practitioners; from members of the scientific community to anyone simply looking to learn more about these most remarkable trees.

Ebenus cretica

Mediterranean Garden Society

Founded in Greece in 1994, the Mediterranean Garden Society focuses on the conservation of water and the use of drought-resistant plants to create beautiful and sustainable gardens in summer-dry climates. It has a much-visited internet forum, open to members and non-members, where contributors post a wide range of information on Mediterranean plants (mgsforum.org).

The headquarters of the Mediterranean Garden Society is at Sparoza, a 1.2-hectare estate in Attica, Greece, the property of the Goulandris Natural History Museum. Here it maintains an important garden in which the principles of waterwise, climate-compatible gardening are put into practice and plants are constantly tested for their ability to withstand drought, providing a valuable model in these days of climate crisis.

The Mediterranean Garden Society

Phoenix theophrasti in Crete

Mediterranean Plants and Gardens

Mediterranean Plants and Gardens is a cooperative mutual support group for amateur and professional horticulturists interested in Mediterranean plants and their use in gardens. It has 470 members.

Currently planned are online lectures, guided visits to Corfu, Cyprus and Turkey with specialist botanical guides, and a summer garden tour in Cheshire in the UK. Events are open to members only.

MPG invites applications for bursaries from all members, particularly horticulturists. These may be for a subsidy to take part in an MPG event or to help fund activities with a connection to Mediterranean plants and gardens. More information, including reports by previous bursary recipients, is on the website.

Primula auricula 'Prosperine'

National Auricula and Primula Society – Northern Section

Formed in 1872, the Northern Section has members all over the world and is always happy to welcome new people. Its more experienced members are on hand to encourage and advise on how to achieve the best in growing, and hopefully showing, auriculas and primulas.

The Society holds three shows each year and a full day seminar AGM, all free to members. It has plant sales at these events with plants supplied by members that are mostly unavailable elsewhere. The website is accessible to members and contains pictures, contacts, help and more, and our archive and library hold books and other specialist literature.

2024 EVENTS

- Advice from expert growers
- Access to archive and library

Primula auricula 'Regency Wizard'

National Auricula and Primula Society – Southern Section

The Society was formed in 1876, by and for enthusiasts who raised and showed auriculas, gold-laced polyanthus and other primulas. Some are rare and difficult to grow, others are well-known garden plants.

Auriculas, primroses and polyanthus have been grown in the UK since the 16th century. Auriculas in particular enjoyed enormous popularity with growers and exhibitors in the 18th and 19th centuries.

The Society welcomes both experts and novices who want to share their passion for these fascinating plants. Their shows, with plant sales, take place three times a year. Members stage their plants in the morning and displays are open to the public in the afternoon.

2024 EVENTS

- 9 Mar Early Primula Show
- 13 Apr Primula Show
- 27 Apr Auricula Show
- 12 Oct Autumn meeting & AGM

*Chrysanthemum 'Jolly Rose'*

National Chrysanthemum Society

Founded in 1846, the National Chrysanthemum Society is a registered charity and its primary objective is to promote the cultivation of *Chrysanthemum*. The Society focuses on educating members and affiliated societies on the cultivation of all types of *Chrysanthemum* through its publications, exhibitions, lectures.

The Society hosts two national shows at the Staffordshire County Showground each year. There are also shows hosted by regional groups and local societies. Affiliated memberships are offered to local horticultural societies who wish to offer NCS medals and certificates of merit at their shows.

The Society offers a warm welcome for those new to growing and those who wish to improve their knowledge, as well as those who want to be introduced to other growers and receive advice from top exhibitors.

*Dahlia 'Tahoma Lady Oh'*

National Dahlia Society

The world's largest dahlia society, the National Dahlia Society promotes dahlias through exhibitions, trials and conferences. Its main national exhibitions are at RHS Garden Wisley in Surrey and Newby Hall in North Yorkshire, with displays at other shows around the country.

The Society holds two annual conferences, where members can hear world-class speakers, buy plants and tubers of all the latest and best cultivars, and chat with other enthusiasts. The Society keeps its members informed on every aspect of dahlia news with two annual publications. New members receive a classified directory (containing lists of recommended cultivars, rules for showing dahlias and addresses of more than 200 local societies affiliated to the NDS) and the much-acclaimed publication *Dahlias For You*.

Lathyrus odoratus 'Noel Sutton'

National Sweet Pea Society

Founded in 1900, the National Sweet Pea Society is a registered charity dedicated to these wonderful flowers. The Society aims to share its knowledge of sweet peas and other *Lathyrus* species, and to improve and extend their cultivation. This includes holding annual scientific trials, hosting national exhibitions twice each year, and creating displays at RHS and other flower shows. The Society also supports around 100 affiliated societies in the UK and Ireland by organising regional and local contacts and meetings.

At least four publications are produced each year, exclusive to members.

Nerine bowdenii

Nerine and Amaryllid Society

The Nerine and Amaryllid Society is for all those with an interest in plants of the *Amaryllidaceae* family. Its main focus is on nerines, but the family includes many popular plants such as daffodils, snowdrops, agapanthus and alliums, and less well-known plants such as scadoxus.

Run entirely by volunteers, the Society organises visits, study days and talks, mounts a stand at the Malvern Autumn Show, supports research, runs a bulb exchange twice a year, and publishes a journal three times a year.

The Society is keen to encourage beginners by offering advice and access to a wide range of plant material through its bulb exchange.

Abutilon 'Leila Jackson'

Plant Heritage

Plant Heritage is the only national charity focussing on plant conservation to ensure the cultivated plants we grow now will be available to future generations for cultural, medical, culinary and aesthetic use.

The National Plant Collections are at the heart of the charity's work, each creating a unique living plant library representing the diversity of our garden plants. In addition, the Plant Guardian scheme encourages individuals to get involved in plant conservation by nurturing one or more rare or unusual plants.

A network of local groups around the country offers access to rare and unusual plants through plant fairs, talks, visits and a free annual plant exchange.

Plant Heritage asks you to share your plant passion by joining them and helping support plant conservation.

- Become a Plant Guardian

Rhododendron suilenhense

Rhododendron Species Conservation Group

The Rhododendron Species Conservation Group consists of rhododendron species enthusiasts. Its aim is to establish subsections of *Rhododendron*, particularly species threatened in the wild, in suitable gardens interested in maintaining them. The Group also surveys gardens with important rhododendron collections in order to create a database. Members get the opportunity to participate in fieldwork in the Group's outreach gardens.

Members encourage conservation through seed and plant propagation of rare material, which is made available to members. The Group arranges lectures and visits to rhododendron gardens not generally open to the public.

Lilium speciosum var. *clivorum*

RHS Lily Group

Created in 1931, the Group encourages the cultivation of lilies and nomocharis, as well as erythroniums and fritillaries. It recently participated in a three-year trial at RHS Garden Wisley of more than 200 commercial hybrids and species.

The Group's seed list contains the widest range of *Lilium* species available anywhere in the world (rhslilygroup.org/seed-list-archives). It holds an annual bulb auction (UK members only) where members have the chance to bid for rare bulbs, many not commercially available. Amateur or professional, you are welcome to join the Group to learn more about how to grow lilies from seed to flowering bulbs. Members can join online presentations and events where knowledge and experience is shared. These cover subjects such as lilies in the wild and cultivating rare species and gardenworthy hybrids.

2024 EVENTS

Please see website for full details of shows and events.

The work of the RHS

The RHS was founded in 1804 to inspire passion and excellence in the science, art and practice of horticulture. Our vision is to enrich everyone's life through plants, and make the UK a greener and more beautiful place. We believe everyone in every village, town and city should benefit from growing plants to enhance their lives and build better communities and places to live.

We held our first flower shows in 1820, were granted a Royal Charter in 1861 and acquired RHS Garden Wisley, our flagship garden, in 1903. From our first meetings in a small room off London's Piccadilly, we have grown to become the world's

largest gardening charity. At our gardens and shows, and through our scientific research, publications, libraries and our education and community programmes, we inspire a passion for gardening, promote the value of gardens, demonstrate how gardening is good for us and explain the vital roles that plants undertake.

The RHS is committed to bringing the joy of gardening to millions more people around the UK and inspiring the next generation of gardeners. By investing in the future of horticulture we can help safeguard a £10.4 billion industry employing more than 300,000 people.

Complete guides to garden plants from the RHS

Intensely researched, beautifully illustrated, essential reading

Lathyrus: The complete guide

Greg Kenicer & Roger Parsons

Including 500 fully illustrated sweet pea cultivars, this book also introduces the other 150 species of the diverse and beautiful *Lathyrus* genus in a glorious volume full of detailed information

Colchicum: The complete guide

Christopher Grey-Wilson,
Rod Leeds & Robert Rolfe

From autumn-flowering garden showstoppers to rarer spring-flowering types, this book covers all 104 species and illustrates more than 80 cultivars of these beautiful flowers

INVESTING IN THE FUTURE OF HORTICULTURE

The RHS is investing £160 million in the future of horticulture across its work. As part of this national investment we are fundraising £40m to transform our gardens, outreach and education facilities to help raise the profile of horticulture, inspire more people to garden and share our knowledge with as many audiences and communities as possible.

- At RHS Garden Wisley, our flagship garden, we have opened RHS Hilltop – The Home of Gardening Science which houses laboratories, a herbarium, event spaces, classrooms and libraries.
- At RHS Garden Hyde Hall much of our investment has come to fruition with a new Learning Centre, so that we can reach out to more schools and visitors. There has also been investment in key infrastructure and horticulture.
- Our brand new RHS garden in Salford,

Greater Manchester, is now open. RHS Garden Bridgewater, once complete, will provide an exceptional horticultural resource for the people of North West England.

- At RHS Garden Harlow Carr we are planning to restore the Harrogate Arms and incorporate it into the garden landscape.
- Through Britain in Bloom, It's Your Neighbourhood and a host of community outreach we're greening up grey areas of our communities.
- The Lindley Library in London has been reconfigured to allow visitors better access to our collections.
- We're raising the profile of careers in horticulture, helping to safeguard the future of the industry.

Below RHS Hilltop – The Home of Gardening Science houses scientists helping the UK's 30 million gardeners.

RHS Plant Trials

The RHS trials a wide range of ornamental and edible plants to test their performance. The best may receive prestigious RHS Award of Garden Merit (AGM). The award is the RHS seal of approval for plants that perform reliably in the garden, and the logo often appears on the plant label.

The trials enable multiple selections of the same plant to be grown side by side under the same conditions so they can be compared. Trials are assessed by an RHS forum and the results are ratified by a relevant plant committee to decide which plants should receive an AGM, and if any current AGMs should be rescinded. An AGM can also be awarded by round-table assessment.

Trials at RHS Garden Wisley are now held in a new purpose-built Trials Garden. This has been joined by a permanent trials area at RHS Garden Bridgewater which will allow trials to take account of climate differences across the UK. There are also RHS trials held at gardens and nurseries across the UK, including the three other RHS gardens, and also at RHS partner gardens. Visitors are welcome

to visit the trials at RHS Gardens. In addition, many of the other locations are open to visitors or have special public open days.

Above A recent *Geum* trial assessed many modern cultivars.

RHS Plant Committees

The seven RHS plant committees provide an invaluable source of horticultural expertise. Committee members come from all corners of horticulture – amateur, professional and commercial. They voluntarily commit their time to act as our ambassadors, helping us to promote plant excellence, extend our regional, national and international networks, and inspire everyone to grow. Some of the ways in which all our plant committees do this are:

- Giving talks, cultural demonstrations and advice at shows, public events and community projects around the country and promoting membership recruitment opportunities.
- Proposing plants for RHS trials and contributing to the expertise of trials forums.
- Providing advice to gardens on collections and planting plans.

- Assisting the RHS in its rolling review and round-table assessments of Award of Garden Merit (AGM) plants.
- Ratifying all recommendations for the Award of Garden Merit from trials forums and round-table assessments.
- Assessing plants for award at their committee meetings.
- Nominating and deciding on RHS annual awards to plants and people.
- Contributing to the scheduling of horticultural competitions and participating in show judging panels.
- Providing strong links with plant societies, National Plant Collection holders, gardening clubs and other associations.
- Promoting careers in horticulture to people of all ages, and mentoring by welcoming students and horticulturists to their meetings and events.

- Supporting RHS initiatives such as National Gardening Week, Horticulture Matters, Green PlanIt Challenge, Campaign for School Gardening, Britain in Bloom, and It's Your Neighbourhood.

Alpine & Rock Garden Plant Committee

Formed in 1936 as the Joint Rock Garden Plant Committee, the committee consists of experts in these specialised plants and their diverse growing conditions. As well as its own

The judging at RHS competitions is supported by committee members.

meetings, the committee attends Alpine Garden Society and Scottish Rock Garden Club shows and events all over the UK, judging and assessing rock garden and alpine plants for RHS plant awards, including the Award of Garden Merit.

Bulb Committee

The committee evolved in 2013 from the Daffodil & Tulip Committee which was formed in 1884. Its wider remit now covers plants with bulbs and other subterranean storage organs, including corms, tubers and rhizomes. Its members also contribute to the production of the *Daffodil, Snowdrop & Tulip Yearbook* and help to organise and judge relevant plants at regional horticultural shows and competitions. The committee has strong links internationally, particularly in the Netherlands, and representatives of

the RHS Lily Group also sit on this committee. The RHS is the International Cultivar Registration Authority for daffodils and lilies.

Fruit, Vegetable & Herb Committee

Formed in 1858, this is the oldest plant committee and its membership includes representatives from the RHS Fruit Group. Its members assist with the scheduling and judging of fruit, vegetable and herb classes at horticultural competitions and shows. They also participate in cultivar identification at various locations around the country and contribute expertise to RHS apps and campaigns.

Herbaceous Plant Committee

The committee, formed in 1859 as the Floral Committee and renamed in 2005, has a huge remit covering hardy

RHS plant committee members add their expertise to trial judging.

RHS committee members contribute to garden judging at RHS shows.

Many RHS plant committee members sit on panels judging floral exhibits at RHS shows.

herbaceous perennials including carnations and pinks, chrysanthemums, delphiniums and grasses. It works collaboratively with the Tender Ornamental Plant Committee on the assessment of seasonal bedding plants, both in formal trials and within the rolling review of the Award of Garden Merit. The RHS is the International Cultivar Registration Authority for dahlias, delphiniums and dianthus.

Orchid Committee

The committee was formed in 1889 and holds meetings around the country, working with local orchid societies and assessing more than 200 orchids for RHS plant awards every year. It has strong international links and its members represent the committee and the RHS at events all over the world. The committee

Committees such as the RHS Orchid Committee regularly assess plants for awards.

assists in the planning and delivery of the annual RHS Orchid Show. The RHS is also the International Cultivar Registration Authority for orchid hybrids.

MEMBERSHIP OF PLANT COMMITTEES

The RHS makes some changes to its plant committee membership each year to ensure they remain relevant, vibrant and diverse. Enquiries on committee membership from plant society members with expertise in any of the different plant

groups, and who are able commit to attending a varied programme of meetings and events, are welcomed.

For more information contact plantcommittees@rhs.org.uk.

Tender Ornamental Plant Committee

Formed in 1963 and renamed in 2005, the committee comprises experts in growing tender plants from around the world, which, in temperate climates, are normally grown under protection. Its annual programme of events includes talks and demonstrations at a variety of flower shows, and it works collaboratively with the Herbaceous Plant Committee on the assessment of seasonal bedding plants, both in formal trials and within the rolling review of the AGM list.

Woody Plant Committee

The committee was formed in 1859 as part of the Floral Committee and renamed in 2005. It is the source of expertise for hardy trees and shrubs, including old hybrid roses, rose species and hardy climbing plants. The committee makes study visits to important collections and has links with the International Dendrology Society and other societies, and membership includes representatives from the RHS Rhododendron, Camellia & Magnolia Group. The RHS is the International Cultivar Registration Authority for clematis, conifers and rhododendrons.

RHS Horticultural Bursaries – start your adventure

The RHS offers a range of bursaries for projects, expeditions and other activities related to horticulture. These might include a voluntary work placement in a leading botanic or historic garden, an expedition or study tour to see plants in their native habitat, or attending a horticultural conference or symposium. In fact, any project, visit or study tour with a clear relevance to horticulture could be eligible.

Apply for a bursary

Anyone, from knowledgeable amateur gardeners to botanical artists, soil scientists, arboriculturists and those working in plant nurseries can apply for a bursary, provided certain criteria are met.

Following completion of a bursary-supported project, each recipient is requested to write a report on their experience. These are accessible to the public through RHS Libraries, ensuring that the knowledge gained is spread throughout the horticultural community.

More than £150,000 is awarded in bursaries by the RHS each year. This is thanks to charitable donations and bequests from benefactors wishing to further the interests of horticultural education.

For more information on how to fund your horticultural adventure with an RHS bursary, or to make a donation to the Society's bursary fund, visit rhs.org.uk/bursaries or email bursaries@rhs.org.uk

RHS Affiliated Societies – get involved

The RHS supports nearly 2,700 Affiliated Societies, making it Britain's largest network of gardening clubs and horticultural groups.

Any club or society that promotes horticulture at a local level, holds regular meetings and/or an annual show is eligible to join the RHS Affiliated Societies scheme. By becoming an Affiliated Society, groups will gain access to a wealth of benefits, knowledge and resources. This includes a free annual visit to an RHS garden for up

to 55 members and a free 50% discount card to use at any RHS garden. Other benefits include a beautiful medal and certificate to award at the club's annual show, a monthly copy of *The Garden* magazine, an information pack offering society-related support, and free group gardening advice from RHS advisors, plus access to a really useful list of speakers and judges. Insurance and specialist stationery is available too.

If your club is interested in joining, just

email us and we will provide you with all the details you need. If you're looking to join a club, check out the RHS Community Map showing all local affiliated and other community groups. For further information, please visit our website.

The year ahead: horticultural events at RHS Gardens in 2024

The RHS has an exciting programme of horticultural events, courses and workshops that run throughout the year. These take place at all five of the RHS Gardens, many involving plant societies and specialist nurseries. The list below highlights a few key plant society shows for 2024, and full details of all shows are available on the RHS website.

RHS Garden Bridgewater

23 Mar Cyclamen Society Spring Show
27 Apr British Iris Society Late Spring Show
13–14 Jul National Sweet Pea Society Late Show

RHS Garden Harlow Carr

3–5 May RHS Tulip, Daffodil & Rhododendron Competition
3–4 Aug Orchid Weekend
21 Sep Cyclamen Show
12 Oct National Alpine Show
18–20 Oct RHS Late Fruit & Vegetable Competition

RHS Garden Hyde Hall

20–21 Mar Early Daffodil & Hyacinth Competitions

RHS Garden Rosemoor

9–10 Mar RHS Rhododendron, Camellia and Magnolia Group Spring Flower Show
20–21 Apr RHS Rhododendron, Camellia and Magnolia Group Rhododendron Show
25–27 May Carnivorous Plant Society Show

RHS Garden Wisley

10 Feb Iris & Cyclamen Winter Show
15–17 Mar RHS Orchid Show
6 Apr Spring Ornamental Plant Competitions
4–5 May Bonsai Show
25–26 May Iris & Clematis Summer Show
15–16 Jun Plant Society Show
22 Jun Pelargonium & Geranium Show
26–27 Jun National Sweet Pea Society Show
29 Jun Alpine Garden Society Show
20–21 Jul Fern & Carnivorous Plant Show
3–8 Sep National Dahlia Society Show
